

Visit Thames – Update July 2020

Information on public facilities for boaters and walkers along the River Thames and Thames Path from the source to Teddington: Toilets on or close to the Thames Path, and locks with drinking water points.

Below are suggestions for toilet facilities along or nearby to the River Thames. Where possible we have updated the information on whether these are currently open as of 23 July 2020. If there is no information on opening, we have been unable to confirm the status. Currently all toilets and showers at the Locks (Environment Agency) are closed. For up-to-date information on the lock facilities please check [here](#).

We would suggest checking the latest information on the facilities you need before starting your journey, as this information can change.
